Numbers station - Wikipedia A numbers station is a shortwave radio station characterized by broadcasts of formatted numbers, which are believed to be addressed to intelligence officers operating in foreign countries. Most identified stations use speech synthesis to vocalize numbers, although digital modes such as phase-shift keying and frequency-shift keying, as well as Morse code transmissions, are not uncommon. Radio Shack™, Archer™ and Realistic™ Information Index Radio Shack and Realistic Information Index. You should read this Radio Shack Introductory Information article before any of the other articles here in this section.. Usually any available service manuals can be ordered by contacting either your local Radio Shack store or by calling RadioShack.com at 800-241-8742. Transistor - 101science.com 1. INTRODUCTION - A transistor is a small electronic device that can cause changes in a large electrical output signal by small changes in a small input signal. That is, a weak input signal can be amplified (made stronger) by a transistor. For example, very weak radio signals in the air can be picked up by a wire antenna and processed by transistor amplifiers until they are strong enough to be ... HobbySpace - Space Radio But you don't need a ham radio license and transmitter to participate in space radio. Monitoring of radio transmissions is a popular hobby of its own. You can listen in on satellite downlinks and shuttle communications with police scanners and shortwave radios, available at your local electronics store. Antenna (radio) - Wikipedia In radio engineering, an antenna is the interface between radio waves propagating through space and electric currents moving in metal conductors, used with a transmitter or receiver. In transmission, a radio transmitter supplies an electric current to the antenna's terminals, and the antenna radiates the energy from the current as electromagnetic waves (radio waves).
