New trends in removing heavy metals from industrial ... Heavy metals are generally considered to be those whose density exceeds 5 g per cubic centimeter. A large number of elements fall into this category, but the ones listed in Table 1 are those of relevance in the environmental context. Arsenic is usually regarded as a hazardous heavy metal even though it is actually a semi-metal. Natural product - Wikipedia A natural product is a chemical compound or substance produced by a living organism—that is, found in nature. In the broadest sense, natural products include any substance produced by life. Natural products can also be prepared by chemical synthesis (both semisynthesis and total synthesis) and have played a central role in the development of the field of organic chemistry by providing ... Organic acids as antimicrobials to control Salmonella in ... Salmonella, a food-borne pathogen, has a recurrent incidence in meat and poultry products. Currently, cases of salmonellosis represent very important economic losses in many countries. An alternative for the prevention of Salmonella outbreaks due to consumption of meat and poultry products, are organic acids (acetic, citric, lactic, malic, propionic, and tartaric among others).
